EXPERIENCE

Content Creator | Nexxt Gaming Guild

February 2022 - June 2022

Managed and created WEB3-related content for an organization based in the Netherlands.

- Gained experience in a remote working environment with regular meetings and utilizing Google workspace and Notion.
- Learned communication and collaboration skills by working on projects with coworkers.
- Recorded & edited educational videos and wrote their scripts.
- Managed programs and organized data for events in the community.

PROJECTS

Current Portfolio Website

- Learned and used React.js to build the website.
- Integrated a chatbot into the website to allow users to ask questions about myself using Google Cloud's Dialogflow.
- Used various libraries for features such as animations, emails, icons, and etc.

Microcontroller-Based Temperature and Humidity Predictive Monitoring System for Commercial Indoor Mushroom Farm

- Responsible for coding the front end of the website where a Figma design was used.
- Learned Bootstrap to help create the website's structure and used Javascript for various animations, interactivity, and features.

TruthSeeker.AI

- One of the top 5 project submissions for the Google Developer Student Club's Tara ML! competition for using machine learning to solve everyday problems.
- Used Passive-Aggressive Classifier and Logistic Regression machine learning models to create a program capable of labeling both English and Filipino news as real or fake.
